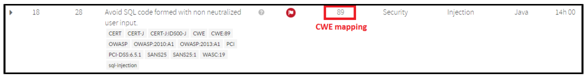
Kiuwan and CWE

Kiuwan and its team makes their best effort to keep up to date with the latest **CWE** version. We map every applicable vulnerability found to the correspondent **CWE**. The mapping is clearly accessible from the list of vulnerabilities found with a direct link to the **CWE** mapped with the vulnerability.



18	28	Avoid SQL code formed with non neutralized user input. CERT CERT-J CERT-J:IDS00-J CWE CWE:89 OWASP OWASP:2010:A1 OWASP:2013:A1 PCI PCI-DSS:6.5.1 SANS25 SANS25:1 WASC:19 sql-injection	89	Security	Injection	Java	14h 00

CWE mapping

With every **Kiuwan Code Security** major release, the mappings are reviewed and modified accordingly to keep up to date with **CWE** versions. If there are any changes regarding **CWE** mappings all users are promptly informed with an in-app message.

See al the information about CWE in the CWE mitre.org site

See also these other Kiuwan's documentation pages to help you understand **CWE** mapping:
